

Division Process Steps! (/)

Step 1: Division- Number Line

Firstly write out your calculation.

$$45 \div 5 =$$

Step 2: Division- Number Line

$$45 \div 5 =$$

Start taking away the amount you are dividing by:

Step 3: Division- Number Line

$$45 \div 5 =$$

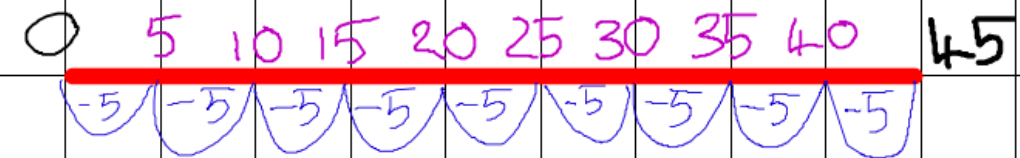

Continue taking away the amount until you reach 0.
(or as close to 0 as you can)

Step 4: Division- Number Line

Remember to write your answer up here!

$$45 \div 5 = 9$$

Count up the jumps you have created.
You have found your answer!
